

DEPARTMENT OF TRANSPORTATION

MEMORANDUM

TO: Capital Program Committee

FROM: Bureau of Capital Program Development

DATE: November 4, 2015

SUBJECT: Problem Screening Recommendation
Paterson Plank Road (CR 681) Bridge over Route 3
Problem Statement, DB 16307
Secaucus Town, Hudson County

The Bridge Management System (BMS) has submitted a Problem Statement for the Paterson Plank Road (CR 681) Bridge over Route 3, located in Hudson County. The Problem Statement identifies the bridge to be structurally deficient due to poor condition of the deck and superstructure. It is also functionally obsolete due to intolerable deck geometry and minimum vertical underclearance. The structure has a sufficiency rating of 27.9 out of 100 and a Priority Rank of 1, based upon the BMS.

Management System scores are not available for this location as it is on a county Roadway.

Based upon the BMS priority ranking of this bridge, it is the recommendation of Capital Investment Planning & Development to graduate this problem statement to Concept Development.
