Route 1, Southbound, Nassau Park Boulevard to Quaker Bridge Mall Overpass	DBNUM: 01330A / UPC: 013301
--	------------------------------------

This project resulted from a Congestion Management Study. Critical concerns are safety/efficiency in the separation of through and local traffic. Widening of Rt. 1 Southbound to 3 through lanes with a 2 lane Collector Distributor (CD) Road is proposed. Driveway access revisions are also included to minimize conflicts.

Operational and safety improvements are proposed in the southbound direction. Critical concerns include the safety/efficiency in the separation of the through and local traffic; safety of the weaving and merge operations on the CD roadway; density of roadside driveways and associated vehicle conflicts; and the inadequate or lack of acceleration/deceleration lanes at Quaker Bridge Mall ramps.

This project is multi-year funded. Total construction funding needed is expected to be \$14,150,000.

Route 1&9, Avenue C to Sylvan Street	DBNUM: 12311 / UPC: 123110
---	-----------------------------------

There are fixed object crashes at this location. Route 1&9 at the CSAO railroad overpass is frequently hit by heavy vehicle traffic because the posted clearance (13 feet - 6 inches) may be incorrect. Also, the existing structure consists of a safety problem for pedestrians that must traverse a narrow passageway between the existing abutment and guiderail.

Total construction funding needed is expected to be \$2,700,000.
