Portal Bridge North	

Funding is for the design, engineering, construction and other necessary initiatives or items to complete the proposed replacement of the existing Portal North Bridge with a new high-level, two track, fixed structure bridge on a new rail alignment. The new bridge will be approximately 1,200 feet long and will have a clearance that accommodates current and forecasted maritime traffic, thereby eliminating the need for a movable span that interrupts rail operations and results in delays due to mechanical failures. This will improve reliability, allowing NJ TRANSIT to operate longer and higher capacity trains. Additionally, trains will be able to cross the bridge at 90 miles per hour, up from 60 miles per hour today.

This element provides funding to advance the Portal Bridge North including, but not limited to, annual EDA or other debt service payments that may be required. This funding is provided to support potential New Jersey State local contribution to the Portal North Bridge Project.

Walter Rand Transportation Center	

The Water Rand Transportation Center (WRTC) is the regional transit hub for southern New Jersey, located across from Cooper University Hospital and Cooper Medical School of Rowan University, in the center of the Business District. WRTC services the Port Authority Transit Corporation (PATCO) high speed line, NJ Transit RiverLINE and proposed Glassboro-Camden Line (GCL), as well as serving as the hub for 26 regional NJ Transit bus lines that connect to Philadelphia, New Jersey and New York. Proposed changes include significant improvements to the building façade, renovations to the interior waiting area (including retail amenities) and new way finding signage. In addition, bus, taxi and train access may be consolidated and made more efficient. Critical to the concept development phase of this project is a focus on improved pedestrian and vehicular traffic flow, which will be accomplished by consolidating all of the existing bus lines inside an expanded and redesigned bus terminal. The redesign of the WRTC will provide better connections for parking, buses, taxis, public transit and retail space making it easier for pedestrians to navigate the transit center and the surrounding area.
