Dear Ms. Amber Cheney:

The New Jersey Department of Environmental Protection issued a Flood Hazard Area Individual Permit, Waterfront Development Individual In-Water and Upland Permits, and Freshwater Wetlands General Permit 10B, under File No. 0000-15-0011.1 FWW180002, FHA180001, WFD180001 and WFD180002, for the referenced site on August 22, 2018. The permit authorized the rehabilitation of the Pulaski Skyway between South Street and the Doremus Avenue in City of Newark, Essex County, between Jacobus Street and Hackensack Avenue in the Town of Kearny, Hudson County, and between the Hackensack River and County Route 501/JFK Boulevard in Jersey City, Hudson County under contracts 5 & 7 within the tidal flood hazard areas of the Hackensack and Passaic Rivers. The project site is located within a public right of way (ROW) in the cities of Jersey City, Newark and Kearny, in Hudson and Essex Counties, New Jersey. These permits, originally set to expire August 21, 2023, were tolled by the Permit Extension Act (PEA 2020), and now expire on November 17, 2024. You have requested that these permits and waiver be extended in accordance with the requirements at N.J.A.C. 7:7A-20.4.

The Department has reviewed your application and hereby extends the terms and conditions of the original permits and waiver to August 21, 2028, which is five years from the expiration of the original permit.

Please be advised that all conditions of the original authorizations remain in force. This letter of extension shall be attached to the previous permit and permit modification. Any additional disturbance of freshwater wetlands, State open waters or transition area shall be considered a violation of the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 et.seq.) unless the activity is exempt, or a permit is obtained prior to the start of the disturbance from the Division of Land Resource Protection.
